Logline

An innocent female college student inadvertently unleashes a dark entity into the world and fights to prevent it from taking her body over and killing those close to her.

Synopsis

Alexandra is a lively college student returning to live with her roommates Jessica and Breanne after the summer holidays. After a night of drinking, Alex agrees to a psychic reading to learn about her future with her boyfriend, Brian, but during the reading a dramatic turn of events causes SOMETHING to go drastically wrong. When Alex awakes the next day, she can't remember the events of the night before. She begins to hear creepy noises, hallucinate, black out and receive unidentifiable scratch marks all over her body. Afraid she's going crazy, she seeks help from her friends but Jessica, Breanne and Brian are incapable of comprehending the scope of the darkness descending UPON her. Instead, Alex receives help from a school professor and his father who have dealt with the supernatural before. But as Alex's condition worsens, it becomes apparent that it may already be too late to stop the entity from using Alex's body as a gateway into our world.

While his frustration may be warranted, Brian's true colors are revealed. Despite how desperately Alex needs him to help her through, Brian proves himself to be selfish, cowardly and ultimately the last thing a woman wants in a boyfriend.

THE MUSIC

JENNINGS

New York based siren Mary Jennings has contributed her song "The Darkness" to the film. Jennings delivers a robust and heartfelt sound that is anything but small-scale. Her music reflects an enormous strength and drive that is uniquely hers, combining a deep range of rock and pop influences. "Jennings' music is sweet, lush, powerful, full of great hooks, intelligent and meaningful to boot! I love it!" said Heather Miller-Rodriguez of 100.1FM KRUU. Platinum award winning producer John Rowe agrees, calling Jennings' music "creative and original... A breath of fresh air!".

GHOST IN THE MACHINE

Milwaukee's Ghost in the Machine is the new storm front in the fusion of Rock and Electronica and has contributed three songs to the film. The resulting sound is hybrid but one would never know it if one went looking for seams. There are none. The fusion is brilliant and perfectly mixed, not to mention original with an eye toward trailblazing.

"Ghost in the Machine brings fresh ideas to the table and shows what electronic-based music and rock and roll can do together." - A&R Select, the leading independent A&R firm in Hollywood, CA.
